The point(s) at which fish and fish products may enter a chain of custody:

The point at which ownership of the product changes is the point of first sale. Chain of custody should therefore begin at the point of first sale.

Due to the suspension of the Central Baltic herring UoCs there have been some key changes to traceability in the fishery. These have been detailed in a separate document, which can be found on the MSC website: <https://fisheries.msc.org/en/fisheries/finland-baltic-herring-sprat/@assessments>

The parties, or categories of parties, that are entitled to use this certificate to enter fish from the certified fishery into certified chains of custody:

An up to date vessel list for both trawl and trap fisheries can be found on the MSC website (<https://fisheries.msc.org/en/fisheries/finland-baltic-herring-sprat/@certificates>) or by contacting LRQA.

Other eligible fishers are trawl operators in the Baltic Sea not included in the UoC(s) above. This is based on a certificate sharing arrangement which includes an agreement of code of conduct and contribution to costs (this is available to view on the MSC website or by contacting LRQA).
